PROFILE SUMMARY

Computer Science & Engineering student with hands-on experience in data analysis, backend development, and dashboard creation through internship and project work. Skilled in Python, SQL, FastAPI, Power BI, and data visualization tools with experience building data-driven applications and extracting actionable insights. Smart India Hackathon Finalist (2024 & 2025) with analytical and technical troubleshooting skills, and collaborative abilities.

EDUCATION

Future Institute of Technology CGPA – 7.39	Aug. 2022 – Jul. 2026
<i>Bachelor of Technology in Computer Science & Engineering</i>	Kolkata, West Bengal

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, C
- **Frontend Technologies:** HTML, CSS
- **Backend Frameworks:** Flask, FastAPI
- **Database:** MySQL, MongoDB
- **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Seaborn
- **BI & Reporting Tools:** Power BI, Excel
- **Development Platforms & Tools:** Git, Visual Studio Code, PyCharm, Cursor, Google Colab, Netlify, Render

EXPERIENCES

AI Data Annotation Intern – Utah Tech Labs	March 2026 – Present
• Annotated and labelled multi-modal datasets (mainly images) with high accuracy following project guidelines. • Reviewed and validated datasets to ensure quality, consistency, and reliability. • Achieved productivity targets while maintaining strict data confidentiality standards.	

PROJECTS

E-Commerce Website	GitHub
• Developed a full-stack eCommerce application using Flask, MySQL, HTML/CSS, and JavaScript, managing 18 products with secure authentication, Wishlist, cart, and order-management workflows. • Implemented 4 core workflows with a responsive UI supporting cross-browser and multi-device compatibility. • Integrated a payment gateway to enable secure online transactions and real-time order tracking.	
HR Attrition Website	GitHub
• Built a full-stack HR Attrition Intelligence Dashboard using FastAPI and JavaScript to analyse 1,470 employee records across 35 features, enabling real-time workforce analytics with <1s API response time. • Performed 12 RESTful APIs and 10 interactive Chart.js visualizations, implementing filtering across 4 workforce dimensions to improve analytical drill-down efficiency by 40%. • Identified an overall ~16% attrition rate, with certain high-risk segments showing 2× higher turnover probability, providing actionable insights for data-driven retention planning.	
Job Market Analysis Dashboard	GitHub
• Created an interactive Power BI dashboard analysing 3,000+ job records across 10+ roles, experience levels (EN–EX), employment types, and remote ratios to present a unified job market view. • Transformed and modelled salary data using Power Query and DAX, creating 15+ KPIs (average salary, job counts, YoY trends, experience-level comparisons) with slicers and drill-through insights. • Revealed key trends including 2–3× salary growth from entry to executive levels, US as the top job market, \$180K+ senior salaries, and a 35–40% salary rise (2020–2022) to support data-driven decisions.
